

Tomorrow's Surveillance Solutions Today

UNILUX^{LTD}
Tomorrow's Surveillance Solutions Today

Unilux Ltd Core Competencies

Unilux Ltd, incorporated in the State of Maryland since 1990, is focused on serving the Security/Surveillance Industry. We are a successful small business based on providing quality products and services to law enforcement and government agencies. In addition to serving these two areas, over the last 20 years we have established the necessary assets and expertise to serve the commercial market with a full service surveillance solution including engineering, procuring, and installing a complete state-of-the-art surveillance system. We are comprised

of three disciplines including: distribution services for over 30 top manufacturers in the security and surveillance industry, custom surveillance solutions specifically manufactured for law enforcement and government agencies, and exclusive representation for law enforcement products including body-worn audio/video surveillance and covert GPS/GSM tracking devices. Unilux Ltd has retained a GSA contract (GS-03F-4115B) for the past 10 years and is also authorized to sell on behalf of several other manufacturers' schedules.

Exclusive Law Enforcement Products

Brief Overview

Over the years Unilux Ltd has engineered many custom video surveillance products integrating state-of-the-art technology to meet the needs and demands of law enforcement officials. Unilux Ltd offers our clients reliable custom products to effectively and efficiently execute their investigations. We have the trained technical staff and large engineering facility to properly manufacture custom surveillance products meeting the demanding specifications of today's mobile and rapidly-changing law enforcement community.

Typical Applications:

- Remote Covert Surveillance and Monitoring
- Suspect Interview Recording — Fixed and Mobile
- Rapidly Deployable Overt Surveillance Platforms
- Alarm and Video Training Kits For Training Field Officers

Featured Projects

For the past 19 years Unilux Ltd has provided engineering, products, solutions, and service to a wide range of customers including: Commercial, State / Local Governments, and Federal Agencies. We strive to provide superior products and services at an affordable cost to our customers. We have established and maintained great communication with our customers in order to provide them with technical support and custom surveillance ideas. Below are some examples of past performance in several different sectors:

Federal Law Enforcement Agencies:

- Custom covert video enclosures utilizing IP and Microwave technologies
- Custom equipment transportation cases
- Design / Build video capture devices
- Engineered / Built both audio and video intelligence gathering equipment for use in undercover vehicles

Military Agencies:

- Coordinated and designed perimeter surveillance protection systems
- Designed / Installed video surveillance systems to secure airports, runways, hangers, and control centers
- Provided full service solution for an IP-based surveillance system utilizing fiber transmission

Government:

- Designed / Installed video systems for various government buildings including: Secured Office Sites, Warehousing, and Training Centers
- Provided custom video equipment based on specific customer demands

State and Local Agencies:

- Manufactured network video solutions for recording and managing IP based cameras worldwide using commercial off-the-shelf products as well as manufacturing custom components
- Designed and Built devices for special projects working in unique environments

Commercial:

- Designed / Integrated / Installed high-value security solutions including CCTV, Access Control, Biometric, and Turn-Style solutions
- Provided product distribution services for all major manufacturers' products to installation / integration firms

Exclusive Law Enforcement Products

Covert Body Worn Audio / Video Surveillance:

Unilux Ltd offers state-of-the-art surveillance kits designed for covert intelligence gathering for body-worn applications. These kits feature covert cameras with a variety of lenses, built-in or external microphones, miniature DVR with expandable memory, internal or external power options, wireless remote ON/OFF switching, and customizable kits to suit your specific needs. They are some of the smallest video surveillance products on the market.

GPS/GSM Based Asset Tracking and Recovery:

Unilux Ltd carries a wide range of GPS tracking products for both law enforcement and commercial applications for high-value asset tracking. We offer products ranging from covert tracking for intelligence gathering to fleet vehicle tracking and control. The core of the system utilizes GPS, GSM, GPRS, RFID, and IP based technology to provide the user with the most accurate tracking. In addition to specific products, we offer our customers the service of customizing this technology to be utilized in virtually any scenario.

Portable Fuel Cell Power:

Unilux Ltd offers a complete line of alternative power sources for any situation where standard AC power is not available. Our alternative fuel sources stem from either Hydrogen fuel cells or Methanol and Water mixture cells. All devices are portable and can be used in two ways including: direct power to a device and ability to re-charge deep cycle batteries for long term use.
